

AUTOMOBILES

Port Metro Vancouver receives nearly 100 per cent of all Asian imports destined for the Canadian market and serves more than a dozen of the world's top auto manufacturers. The Port handles approximately 400,000 vehicles annually through the Vancouver Gateway, making Port Metro Vancouver one of the top three ports on the West Coast for vehicle handling.

As the most efficient gateway for Canadian destined automobiles, Port Metro Vancouver has two auto terminals that supply dealerships across Canada. The terminals can also handle additional cargo, such as heavy rolling machinery and equipment.

Port Metro Vancouver has three Class I railways to provide service to destinations across North America – CN, Canadian Pacific (CP) and Burlington Northern Santa Fe (BNSF) – with SRY Rail Link enhancing these rail networks. The Port also offers easy access to an extensive road network to deliver automobiles to local markets.

Efficient, Diversified, Reliable

- Two common-user automobile terminals located on the Fraser River
- Each terminal has capacity to accommodate approximately 15,000 vehicles at one time
- Top car manufacturers are shipped through the Port
- On-site value-added preparation and distribution services, including vehicle customizing and refinishing
- Precise, accurate and highly organized inventory tracking
- Extensive on-dock rail and truck loading capability, including a large staging area
- Easy access to an integrated, secure, reliable transportation network through the Vancouver Gateway
- Committed to sustainable operations
